Sold Individually, and packaged as requested.
 All part number shown are for our our Standard EX. To get the P/N for a different material change the last 2 letters to one of the following: (FAPaper=FA) (WoodPRO=WP)(Durawood=DW)(GreenKut=GK)(PHDY+=PHDY) (EZ=EZ) (Maxicut=MCT) (Maxicut HD=MCTHD) (Maxicool=MCL) MaxicoolHD=MCLHD)(Coolgel=CG)(BD=BD)
 For WAVE JOINTS a W is put before the P/N as a prefix.

Keystone can Mfg. most any size SANDING DISC to fit your need!

Shop Rolls or “Handy Rolls”

Shop rolls are designed to be used for hand sanding applications. They are truly “Handy Rolls” of flexible cloth abrasives. Shop Rolls are designed so that you can easily pull out and tear off what you need. They are commonly used in fabrication shops, plumbing, and other maintenance and manufacturing operations.

Shop Rolls are NOT suited for drum sanding or belting applications.

Our Standard Shop Rolls are Prepackaged

Assemblies and Slashed Rolls are available in both A/O & S/C:

Stiffer "X" weight
 Flexible "J" weight

The following slashed patterns are available.

- SL-01: 1/8" Stagger Slash
- SL-02: 1/4" Stagger Slash
- SL-10: 1/8" Stagger 1/2 Nash
- SL-11: 1/4" Stagger 1/2 Nash
- SL-13: 1/8" Nash Slashed
- SL-14: 1/4" Nash Slashed

Assemblies are made up of four slashed sheets. Each sheet is designed to match up with a brush on the sander. If you have a 32 brush sander you will need 8 assemblies to make 1 loading. A 16 brush sander needs 4 assemblies for 1 loading.

Abrasive Sponges & Blocks

Grey High Flex Pads

4-1/2" x 5-1/2" x 3/16"
 P60 HIGHFLEX06
 P100 HIGHFLEX10
 P150 HIGHFLEX15
 P180 HIGHFLEX18
 P220 HIGHFLEX22
 P280 HIGHFLEX28

This popular soft backed pad is highly flexible and versatile. A/O Coated on only one side, this easy to hold pad is used in many industries.

Double Side S/C Pad

3.75" x 4.75" x 1/2"
 P100 HF4X510DS
 P150 HF4X515DS
 P180 HF4X518DS
 P220 HF4X522DS

This popular abrasive pad is coated on two sides and is extremely flexible; it conforms to many different shapes, curves and flat surfaces. S/C

Blue Flex A/O Pads

4-1/2" x 5-1/2" x 3/16"
 P100 HIGHFLEXBF10
 P120 HIGHFLEXBF12
 P150 HIGHFLEXBF15
 P180 HIGHFLEXBF18
 P220 HIGHFLEXBF22
 P320 HIGHFLEXBF32

The NEW Blue Flex pad is film based. It is water proof, and long lasting. Premium A/O grain coated on only one side. It is also more aggressive.

Keystone Flex Pads

4-1/2" x 5-1/2" x 3/16"
 P100 HIGHFLEXKF10
 P120 HIGHFLEXKF12
 P150 HIGHFLEXKF15
 P180 HIGHFLEXKF18
 P220 HIGHFLEXKF22
 P320 HIGHFLEXKF32

The NEW Keystone Flex pad is a flexible A/O Cloth Pad. It is water resistant, and long lasting. It is coated on one side. It is more aggressive.

Foam abrasives sand finer than standard Coated Abrasives!

Crossover of what finish to expect.

36 grit = Coarse
60 grit = Medium
100 grit = Fine
150 grit = Superfine
180 grit = Superfine
220 grit = Ultrafine
280 grit = Microfine

Abrasive sponges can be marked with either grit or finish.

4 Sided A/O Block

2.75" x 3.75" x 1"
 P36 SANDBLOCK03
 P60 SANDBLOCK06
 P80 SANDBLOCK08
 P100 SANDBLOCK10
 P150 SANDBLOCK15
 P180 SANDBLOCK18
 P220 SANDBLOCK22

The standard block fits easily into the palm of your hand and is ideal for sanding a variety of surfaces. The 4 sided block can operate in the most awkward places.

Dual Angle Blk A/O

3" x 5" x 1"
 P36 SANDBLOCKDA03
 P60 SANDBLOCKDA06
 P100 SANDBLOCKDA10
 P180 SANDBLOCKDA18

Special Order 250/bx

The dual angled block has two 75° angles and is ideal for sanding in hard to reach places such as corners and edges.

3 Sided Block A/O

2.75" x 3.75" x 1/2"
 P60 SANDBLOCK.506
 P100 SANDBLOCK.510

Special Order 500/bx

The half block is coated on three sides and is more flexible than the standard block allowing the user to work in hard to reach places while conforming the work at hand.

Radius Block A/O

4" x 2.75" x 1"
 P60 SANDBLOCKR06
 P100 SANDBLOCKR10
 P180 SANDBLOCKR18
Special Order 250/bx

Radius Angle Block A/O

4" x 2.75" x 1"
 P60 SANDBLOCKRA06
 P100 SANDBLOCKRA10
 P180 SANDBLOCKRA18
Special Order 250/bx

Phone: 610-939-1060

Keystone's Popular Coated Abrasive Materials

Aluminum Oxide

WoodPRO

High performance aluminum oxide material. It is designed to be durable, providing outstanding life, while it produces excellent and consistent finishes. WOODPRO is best suited for sanding wood. It is especially good for wide or narrow belt wood sanding applications, but it is also effective for disc and drum sanding applications. WOODPRO is an open coat aluminum oxide manufactured on a heavy poly cotton X weight backing. It has antistatic and non loading additives in the resin. WOODPRO is available P36 -P320

Durawood

High performance heavy duty "Y" weight full polyester backed aluminum oxide material. It is designed for heavy duty wood sanding applications. DURAWOOD is manufactured the same as WOODPRO but on a stiffer and stronger backing. It is best suited for wide belt wood sanding applications in coarser grits, where backing strength is required. It is also effective for narrow belt, disc and drum sanding applications. It is similar to Woodpro, but with a heavier backing. DURAWOOD is available in grits P24 thru P220

EX

EX is a "NEW" standard "X" weight aluminum oxide poly cotton coated abrasive material. It is versatile and relatively inexpensive, providing outstanding performance for the money. EX has a strong poly cotton backing and it is suitable for making mini, narrow and wide belts. It is also a good choice for discs and abrasive rolls. EX is good for general sanding of both wood or metal. EX is available in grits P24 thru P320

PHDY+

The NEW Green PHDY+ is a "Y" weight PREMIUM aluminum oxide poly cotton coated abrasive material. It has recently been reformulated and turned green. The new formulation is replacing the Old Brown PHDY, and it is a noticeable improvement. The PREMIUM A/O grain makes it an excellent choice for sanding all types of carbon and stainless steel. PHDY+ is suitable for any size belt, disc or abrasive roll. The PREMIUM grain and an s attractive price.. Green PHDY+ is available in grits P36 thru P400

KX

KX is a standard "X" weight aluminum oxide poly cotton coated abrasive material. KX is a good quality abrasive material that it is durable and versatile. KX has a strong poly cotton backing and it is suitable for making mini, narrow and wide belts. It is also a good choice for discs and abrasive rolls. KX is good for general sanding of both wood or metal. KX is available in grits P24 thru P400 LIMITED AVAILABILTY!

KXGP

KXGP has a darker colored grain and heavier "X" weight aluminum oxide poly cotton coated abrasive material. It is a good quality abrasive material that it is durable and versatile. KXGP has a strong poly cotton backing with a triple coat resin backfill. KXGP is suitable for making mini, narrow and wide belts. It is also a good choice for discs and abrasive rolls. KXGP is a good for general sanding of both wood or metal. KXGP is available in grits P16 thru P400

KXHD

KXHD has a heavier "X" weight PREMIUM aluminum oxide poly cotton coated abrasive material. It is a good quality abrasive material that it is durable and versatile. The PREMIUM aluminum oxide grain makes it an excellent choice for sanding of carbon steel, harder woods. KXHD is suitable for making mini, narrow and wide belts. It is also a good choice for discs and abrasive rolls. The PREMIUM grain and its attractive price, makes it a good choice. KXHD is available in grits P24 thru P600. LIMITED AVAILABILTY!

PHD Poly

PHD Poly has a heavy "Y" weight full polyester backing and PREMIUM aluminum oxide grain. It is an excellent aluminum oxide abrasive material designed for carbon steel sanding applications. The stiffer backing and the PREMIUM A/O grain provide long life and durability. PHD Poly is suitable for making both narrow and wide belts. It also can be used for discs and abrasive rolls. PHD Poly is available in grits P24 thru P400 LIMITED AVAILABILTY!

Keystone's Popular Coated Abrasive Materials

S/C & Aluminum Oxide

EJ

EJ is a standard flexible "J" weight aluminum oxide poly cotton coated abrasive material. EJ is strong but yet very flexible. It is designed for polishing and contoured sanding applications. EJ has a white no fill backing. It is suitable for making mini, and narrow belts. EJ is also a good choice for flexible discs and flexible abrasive rolls. EJ is good for sanding wood, carbon steel and non ferrous metals. EJ is available in grits P60 thru P600

FlexPRO

FlexPRO is a PREMIUM aluminum oxide flexible "J" weight poly cotton coated abrasive material, with grinding aids added to the resin. This provides outstanding performance and consistent finishes for many metal polishing applications. FlexPRO is strong but yet very flexible, and it is among the best metal polishing abrasives available. FlexPRO can also be used for sanding wood. FlexPRO has a white no fill backing. It is suitable for making mini, and narrow belts. FlexPRO is available in grits P60 thru P600

Coolflex

Coolflex is a PREMIUM aluminum oxide semi flexible "J" weight poly cotton coated abrasive material, with grinding aids added to the resin and top coat. This provides outstanding performance and consistent finishes for many stainless steel sanding, other metal sanding applications. Coolflex is strong but not as flexible as FlexPRO or EJ, making it better for finishing flat parts. CoolFlex is suitable for making mini, and narrow belts. Coolflex is available in grits P60 thru P600

Superflex

Superflex is a 100% cotton PREMIUM aluminum oxide very flexible "J" weight coated abrasive material. It has grinding aids added to the resin and top coat for cooler grinding. This provides outstanding performance and consistent finishes for many stainless steel, and carbon steel sanding applications. The 100% cotton backing disbursts heat well, and also makes easier to tear. Superflex is suitable for making mini belts, narrow belts and specialties. Superflex is available in grits P60 thru P600

FA Paper

FA Aluminum oxide "F" weight paper for wood. FA Paper is an excellent quality aluminum oxide paper, primarily used in delicate wood sanding applications. Extra care must be taken when handling paper belts, because they can easily be damaged. FA Paper is manufactured on an F weight paper backing with an open coat aluminum oxide grain. It is also antistatic. It is commonly used for wide belts, but can also be used for discs and some roll applications. FA Paper is available P80- P220 grits.

BD

BD is a HIGH quality closed coat silicon carbide waterproof 100% polyester cloth material. Grits 24 through 80 are on a heavy "Y" weight backing, and grits 100 - 800 are on a heavy "X" weight backing. BD is an excellent choice for glass sanding applications, but it also works effectively on wood, metal, plastic, fiberglass, and rubber, where loading may be a problem. BD is among the best in the world in this class of material. Can be used for discs, narrow and wide belts. BD is available in 24 - 1000 grit.

Blue Film

Blue Film is changing the industry. Blue Film is made on a 5 mil PET film base using PREMIUM Aluminum oxide grain. It has non loading, and grinding aids in the resin, that provides excellent life and durability. The Blue Film is an outstanding product for many disc applications. Great for automotive, wood, metal, corian, fiber glass and many other disc sanding applications. Blue Film is available in grits P40 thru P2000 in H&L and PSA.

Gold Paper

Gold Paper is an aluminum oxide "C" weight gold paper designed for disc sanding applications. The Gold Paper is a quality paper that provides outstanding life and superior finishes. It is commonly used on automotive, wood, metal, fiber glass and other disc applications. Gold Paper can also be used to make sheets and abrasive rolls. Gold Paper is available in grits P60 thru P600 in H&L and PSA.

Keystone's Popular Coated Abrasive Materials

Zirconia

EZ

EZ is a NEW "X" weight alumina ZIRCONIA poly cotton coated abrasive material. EZ is a cost effective good quality ZIRCONIA abrasive material that it is designed for sanding carbon steel. EZ has a strong poly cotton backing and it is suitable for making mini, narrow and wide belts. It is also a good choice for discs and abrasive rolls. EZ is a good choice for any carbon steel sanding application. EZ is available in grits P24 thru P180

Maxicut

Maxicut is a heavy duty "Y" weight full polyester ZIRCONIA coated abrasive material. With it's strong stiff backing, and durable ZIRCONIA grain, Maxicut is an excellent choice for grinding gate, welds and other heavy duty carbon steel sanding applications. Maxicut can be used to make narrow and wide belts. It is also can be used to make heavy duty discs and abrasive rolls. Maxicut is available in grits P24 thru P120

Maxicut HD

Maxicut HD is a heavy duty "Y" weight full polyester ZIRCONIA abrasive material. With it's strong stiff backing, & durable ZIRCONIA grain Maxicut HD is an excellent choice for grinding gate, welds and other heavy duty carbon steel sanding applications. Maxicut HD can be used to make narrow and wide belts. It has a slightly heavier backing and different grain mix then Maxicut. Maxicut HD is available in grits P24 thru P120

Maxicool

Maxicool is a heavy duty "Y" weight full polyester ZIRCONIA coated abrasive material, with a top coat grinding aid added for cool cutting action. Maxicool is an excellent choice for sanding stainless steel, and carbon steel where grinding temperature is an issue. Maxicool can be used on non ferrous metals. It can be used to make narrow and wide belts, heavy duty discs. Maxicool is available in grits P24 thru P120

Maxicool HD

Maxicool HD is a heavy duty "Y" weight full polyester ZIRCONIA abrasive material, with a top coat grinding aid added for cool cutting action. Maxicool HD is an excellent choice for sanding stainless steel, and carbon steel where grinding temperature is an issue. Maxicool HD can be used on non ferrous metals. It can be used to make narrow and wide belts, heavy duty discs. Maxicool HD is available in grits P24 thru P120

GreenKut

GreenKut is a NEW ceramic grain coated abrasive material designed specifically for wood working applications. In many cases, GreenKut can provide 5 - 10 times the life over standard aluminum oxide when sanding wood. 60 grits is available on a "Y" weight backing, while 80, 100, 120, 150, & 180 grits are on a heavy "X" weight backing. Because of the outstanding life & durability the GreenKut is becoming a popular choice for woodworkers. Available in 60, 80, 100, 120, 150, & 180 grits.

FlexGel

FlexGel is a ceramic grain coated abrasive "J" weight poly cotton coated abrasive material, with grinding aids added to the resin. It is a high performance metal polishing material, provides outstanding performance and consistent finishes. FlexGel is strong but yet very flexible, and it is among the best ceramic metal polishing abrasives available. It is suitable for making mini, and narrow belts, plus disc applications. It can last 3-5 time the life of A/O for metal polishing. FlexGel is available in grits P60 thru P220.

CoolGel CA

Coolgel CA is a ceramic alumina blend on a heavy "Y" weight full polyester backing, with a top coat grinding aid to promote cooler grinding temperatures. It is designed for sanding stainless steel, and other carbon steel alloys. The heavy backing and the grain mix, make this product optimal for many off hand grinding applications where less pressure is applied. Coolgel CA is suitable for making narrow & wide belts, plus discs applications. Coolgel CA is available in grits P24 thru P120

CoolGel HD

Coolgel HD is a HIGH concentrate ceramic coated abrasive on a heavy "Y" weight full polyester backing, with a top coat grinding aid to promote cooler grinding temperatures. It is designed for sanding stainless steel, and other carbon steel alloys. The heavy backing and the grain mix, make this product optimal for higher pressure sanding applications. Coolgel HD is suitable for making narrow & wide belts, plus discs applications. Coolgel HD is available in grits P24 thru P120

Ceramic

Keystone's Popular Coated Abrasive Materials

Fiber Ceramic Zirconia Cork Compact

Compact Dry is a NEW high performance, specialty manufactured, aluminum oxide grain abrasive material. Compact Dry is designed to provide long life and durability on metal finishing applications. This product does require an initial "break in" period where it is noticeably more aggressive, but after that it will generate consistent finishes and can out perform standard A/O products, 3-5 times. The Compact Dry is to be used only on dry applications. Available in 80, 120, 180, 240, 320, 400, 600 grits. LIMITED AVAILABILTY!

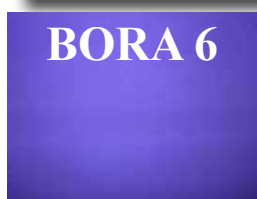

Compact Wet is a NEW high performance, specialty manufactured, aluminum oxide grain abrasive material. Compact Wet is designed to provide long life and durability on metal finishing applications. This product does require an initial "break in" period where it is noticeably more aggressive, but after that it will generate consistent finishes and can out perform standard A/O products, 3-5 times. The Compact Wet can be used wet or dry. Available in 80, 120, 180, 240, 320, 400, & 600 grits. LIMITED AVAILABILTY!

Compact S/C is a NEW high performance, specialty manufactured, silicon carbide grain abrasive material. Compact S/C is designed to provide long life and durability on glass and metal finishing applications. This product does require an initial "break in" period where it is noticeably more aggressive, but after that it will generate consistent finishes and can out perform standard S/C products, 3-5 times. The Compact S/C can be used on wet or dry. Available in 80, 120, 180, 240, 320, 400, 600, 800 & 1000 grits.

FS Cork is a specialty product primarily used in the glass industry to finish glass edges. The grain is 100% cork, and it has no cutting action. It is just used to polish or finish glass edges. FS Cork is suitable for making narrow belts and discs. FS Cork has a cork grain size equivalent to 36 grit. Note: FS Cork is also available with S/C grain impregnated in the cork. This is primarily used for metal finishing applications. This product is called Super Finishing Cork, and it is available in 400, & 600 grits.

BORA 6 is a NEW High Performance Zirconia Material Manufactured with NEW Technology, providing better life and cut rates. The BORA 6 is a Y wt Polyester backing with additives in the formula designed to provide optimal sanding performance on stainless steel. It also works well on carbon and non ferrous alloys. Bora 6 is similar to Maxi-cool but with a new resin system, and top coat. Bora 6 is suited for manufacturing narrow, or wide belts and sanding discs. Available in grits 24 - 120. LIMITED AVAILABILTY!

BORA 7 is a NEW Ceramic Material Manufactured with NEW Technology, providing better life and cut rates. The BORA 7 is a Y wt Polyester backing with HIGH Concentrate Ceramic designed for sanding high carbon alloys. It is similar to Coolgel HD but with a new resin system, and top coat. Bora 7 is suited for manufacturing narrow, or wide belts and sanding discs. It is manufactured in grits 24 - 120. LIMITED AVAILABILTY!

RF A/O is an standard aluminum oxide fiber backed material. RF A/O has a commercial grade fiber, and it is one of the best standard A/O resin fiber discs available. RF A/O is commonly used to grind, carbon steel, gate and welds. But can also be used for a wide variety of other applications. RF A/O is available in grits P16 thru P150.

RF A/O + is a PREMIUM aluminum oxide fiber backed material. RF A/O+ has a commercial grade fiber, and it is one of the best PREMIUM A/O resin fiber discs available. The RF A/O+ is commonly used to grind, stainless steel, but can be used on many other metals, and a wide variety of other applications. Can only be used in dry applications. RF A/O+ is available in grits P24 thru P120.

RF Z/A is a Zirconia fiber backed material. RF Z/A has a commercial grade fiber, and it is one of the best Zirconia resin fiber discs available. RF Z/A is commonly used to grind, carbon steel, gate and welds. It can also be used for a wide variety of other applications. RF Z/A is our most popular product for RFD. RF Z/A is available in grits P24 thru P120.

Backing Information

Cloth		Paper	
Weight	Description	Weight	Description
YY or H	Extra Heavy Duty, Very Stiff	F	300g Heavy Belt Grade
Y	Heavy Duty, Semi Stiff	E	250g Belt Grade
X	Standard Cloth Backing	D	140-200g Heavy Cabinet Grade
K	100% Cotton Backing	C	100-120g Cabinet Grade
J	Semi Flexible Backing	B	85 - 95g Heavy Finishing
FJ or JJ	High Flex Backing	A	60 - 80g Finishing Grade

Basic Grain Information

Emery	Soft mineral used for hand sanding metals
Garnet	Soft mineral used for hand sanding woods
Silicon Carbide	Sharp hard but friable grain used to sand glass, stone, synthetics
White A/O	Sharp friable A/O grain often used to sand softer or resinous woods
Brown A/O	Standard Aluminum Oxide commonly used to sand wood and metal
Blue HT A/O	Heat treated premium A/O commonly used to sand metals
Alumina Zirconia	Z/A and A/O mix for optimal performance sanding harder metals
Zirconia	High concentrate zirconia used for high pressure sanding of metal
Ceramic Alumina	C/A and A/O mix for optimal performance sanding harder products
Ceramic	High concentrate ceramic used for very high pressure sanding jobs

Keystone Abrasives Supplies Quality Abrasive Coated Abrasive Products!

Email: keystone@keystoneabrasives.com

Phone: 610-939-1060

Terms & Conditions

Keystone Abrasives accepts the following Credit Cards:

Payment Terms for Open Accounts

Upon credit approval, net 30 day terms will apply, unless otherwise specified. Any invoice that is 15 days, or more, late will be considered delinquent. All delinquent invoices could result in credit hold status, and/or other appropriate action to collect the delinquent amounts. Any customer checks returned for insufficient funds will be charged an extra \$30 per check.

To Open an Account

To open an account, please submit Tax ID Number, Sales Tax Exempt Certificate, three trade references and one or more bank references. Include with all references, complete address, phone and fax number and contact person. Please allow appropriate time for credit evaluation. Orders placed prior to account approval can be shipped, C.I.A. or paid by Credit Card as agreed.

Order Cancellation

No order can be cancelled, without liability, unless notice of change is made before and accepted by Keystone Abrasives before work is in process. Cancelled orders, where work is in process, may be subject to a sur-charge.

Quality

Keystone Abrasives takes great pride in the abrasive products we supply. In the event there is a quality problem we ask our customer to bring it to our attention immediately. Keystone will replace or issue credit for any substandard product that does not meet the written specification and tolerances supplied by our customers. Products that are discarded or not returned will not be eligible for credit.

Returned Goods

Authorization must be obtained from Keystone Abrasives Co. before returning any merchandise for credit. Returned merchandise may be subject to a restocking charge and/or a repackaging charge, as warranted. Custom made items are not refundable, except in the case of manufactured defects that do not meet the customer specified size tolerances, or obvious defect in the abrasive material itself.

Liability

Keystone Abrasives Co. liability is limited to a maximum of the invoiced price. Many sanding or cutting applications do carry an inherent risk to the machine operator and those people in the immediate area. Proper machine operation, and appropriate safety precautions must be taken in order to minimize the risk of injury or bodily harm.

Proof of Delivery

A request for proof of delivery must be made within 30 days of the invoice date. We will not accept responsibility for shortages which are not reported within 10 days of receipt of merchandise. Receipt of damaged goods should be indicated on the B/L and reported immediately to Keystone Abrasives Co..

Freight Policy

All orders will be shipped FOB Reading, Pennsylvania, unless otherwise specified. Motor freight will be shipped collect & parcel shipments will be shipped UPS or Fedex and added to invoice unless otherwise specified. A handling fee may be charged for smaller orders below \$100.

Production Policy

For custom manufactured items Keystone Abrasives reserves the right to supply +/- 10% of the order quantity. Sanding belts require proper curing time. Sanding belts should not be used for at least 72 hours after being joined.

***PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE**

Business Hours: M-Th 8:00am to 4:30pm, Friday 8:00am to 3:30pm EST

Safety Warning: Be sure that all operators are wearing eye, face and body protection when operating equipment for use with coated abrasives. Read all safety warnings supplied with abrasive equipment. All guards must be in place.
